

# When the world's most famous First Lady drops by, can your hotel guarantee complete communications availability?

## Inspired ICT solutions with absolute RELIABILITY

Sandton's Radisson Blu Hotel can and did when the USA's First Lady, Michelle Obama, stayed there. Neotel's ultra-reliable infrastructure provided uninterrupted, secure communications for the First Lady's 150-member retinue as well as other White House staff and the US Secret Service. Hardly surprising given that Neotel's RELIABILITY is backed by 99.999% fibre-optic core network availability, full disaster recovery and multi-path national, metro and international network redundancy.

For more info on how Radisson Blu partnered with Neotel to transform their business, go to [www.neotel.co.za](http://www.neotel.co.za)
