- ✓ Uncompromising quality
- ✓ Cost savings
- ✓ **the best voice your business can buy!**

“We needed stability, quality and optimised costs. Neotel was the best call we ever made.”

Talksure information technology director, Tony Taylor

Talksure is a 4 year-old call centre that provides a range of short term insurance products and prides itself on delivering top-tier professional services to its customers.

“When we realised that we needed to significantly improve quality and reduce our call costs, the decision to go with neotel’s solution was easy,” says it executive Tony Taylor.

“We chose neotel because the cutting-edge sip solution they provided offered just the right balance of availability, quality and cost savings.

Previously we’d had too much downtime, but neotel solved this problem. We have hundreds of users, but despite complications, neotel assisted us with no trouble at all.”

“Installation was completed on time and within budget, and thanks to neotel we saw our costs reduced and our stability and uptime vastly improved.

More importantly, we saw an immediate improvement in the quality of calls when we rolled over to sip,” adds Taylor.

If you’re looking for a jump up in voice call quality combined with a step down in cost, switch to Neotel.
