

# How can we work together to leap the digital divide sooner for more south africans?

## Social RESPONSIBILITY through inspired ICT solutions

When Neotel won the bid to connect up the Western Cape Government with converged, next generation fibre, it was agreed that Neotel would help to fund the Cape Digital Foundation and also rollout 384 Wi-Fi hotspots offering limited free Internet access. As a RESPONSIBLE corporate Neotel showed its commitment to bridging the digital divide by delivering on this commitment and, further, now also offers South Africa's lowest daily, weekly and monthly Internet access rates at all hotspots.

For more info on how the Western Cape Government partnered with Neotel to transform their province, go to [www.neotel.co.za](http://www.neotel.co.za)
